

Edinburgh Law School creates animations to discuss structural injustice, denaturalized natural disasters, epistemic injustice, and the nature of emergencies

*The following series is supported by the Wellcome Trust and led by Dr Agomoni Ganguli Mitra. All animations were created by Vanessa Randle from **thinkingvisually**.*

structural injustice in global health emergencies

https://media.ed.ac.uk/media/1_9teexrw

In this animation, we discuss the concept of 'Structural Injustice'. We look at what it is, how it's different from other kinds of injustices, and why it's important in the context of Global Health Emergencies.

The concept of structural injustice, as discussed in this animation is based on the work of philosopher Iris Marion Young.

Denaturalizing Natural disasters

https://media.ed.ac.uk/media/Denaturalizing+Natural+Disasters/1_7jd6dic1

In our second animation, Professor Matthew Hunt talks about how natural disasters and their impacts are not as 'natural' as they may first appear and how this should influence how we plan for, and respond to, such disasters.

epistemic injustice

https://media.ed.ac.uk/media/Epistemic+Injustice+/1_e6tucbw1

In our third animation, we discuss the concept of Epistemic Injustice and how this relates to Global Health Emergencies. In particular, we focus on the work of Miranda Fricker and discussion of Testimonial and Hermeneutical Injustice.

nature of emergencies

https://media.ed.ac.uk/media/Nature+Of+Emergencies/1_x340u9y3

We are currently living through a world wide global health emergency: the Covid-19 pandemic. Labelling a health event an emergency, disaster, or crisis imply an event that is confined to a certain time span and geographical focus. It is an extraordinary event that requires special measures. These terms in themselves are therefore worth questioning using the lenses of ethics and justice.

In our fourth animation, Agomoni Ganguli-Mitra discusses these terms and their ethical implications.
