

Overleaf Cloud Service Project

The School of Engineering in the College of Science and Engineering is undertaking a project to examine the appetite for a LaTeX authoring tool to support staff and students in creating, collaborating and sharing LaTeX documents.

The project has funded a site license for the [Overleaf](#) cloud service, which is **open to all staff and students** and allows access to a pro account, for the duration of the project which concludes at the end of January 2019.
