

# Home

Welcome to the Informatics Learning Technology Service Support (ILTS) site. Here you can expect to find helpful information on supported technologies for your teaching.

## **Learning technology in Informatics**

Below are quick links to help you get your courses ready for your students and to familiarise you with the commonly used tools for Informatics courses.

---

### [FAQs](#)

Answers to our most frequently asked questions. Please check here before emailing us with a query.

---

### [Updates and news](#)

Our blog with information on changes to existing tools, new technologies, and other important details.

---

### [Course materials](#)

Information and instructions on where and how to share your teaching materials with students, including details on both the Informatics OpenCourseWare site and Blackboard Learn.

---

### [Lecture recordings and media management](#)

Details on how lectures are recorded and how to manage and share these recordings or other videos with your students.

---

### [Assessment and feedback](#)

Find out details around coursework submission platforms, assessment

design support, and examinations.

---

### **[Live online sessions \(virtual classrooms\)](#)**

There are several options for hosting live online teaching events, including Collaborate, Zoom, and MS Teams.

---

### **[Learning design and advice](#)**

In addition to learning technology support , we offer learning design and pedagogical advice across all stages of course and programme development.

---

### **[Discussion boards](#)**

Piazza is the School's recommended platform for course discussion boards. It is integrated with Learn.

---

### **[Accessibility and mainstreamed adjustments](#)**

In 2013, the University 'mainstreamed' a number of learning adjustments, which means that all courses are required to meet certain baselines for all students. These include things like wearing a microphone for lectures and sharing a course outline and reading list at least four weeks before the start of teaching. Please take time to read through [all of these mainstreamed adjustments](#) and make sure that your courses and materials meet the requirements.

We also recommend that you find out more about [inclusive design and how to create accessible materials](#). Feel free to contact us with any questions.
