

Copying a previous lecture recording (Media Hopper Replay)

Our most common enquiry is about how to use a recording made in a previous year in Media Hopper Replay.

As an instructor, you can make a copy of a previous recording in Media Hopper Replay and then upload it to your personal library, thus allowing you to publish it to another linked course in Media Hopper Replay. This one page quick reference guide details the two step procedure to do this for each recording. View the PDF quick reference guide [here](#).

This quick reference guide, along with many others, is available via the IS Media Hopper Replay quick reference guide [website](#).

The IS Helpline supports Media Hopper Replay throughout the University. Contact details are listed [here](#).

Embedding a video in Drupal

To embed a video from Media Hopper Create (MHC) into a Drupal page for your course, please follow these instructions.

Note: you can mostly follow these steps for embedding a video from another platform e.g. YouTube, but how you find the embed code on that platform will be different than the steps for MHC.

If you haven't used Media Hopper Create before or need a bit

of help, IS has extensive documentation and help guides [here](#).

1. Log into your MHC account at: <https://media.ed.ac.uk/>
2. Make sure that the video you want to embed in Drupal is set to either Unlisted or Published. (Not sure how to check or change this setting? Please see IS's guidance on [Understanding privacy levels in Media Hopper Create](#).)
3. Open the video you want to share in MHC and below it, you will see several tabs. Click on the tab "Share" and then select "Embed" (N.B. do not select oEmbed) and then select and copy the full embed code that appears in the box. (Note: you can use the options below the code to choose a different sized embedded player or start/end times for the video. Do **not** use Responsive Sizing at the present time.)

```

Start & End Time: Start at 00:00:00 End at 00:00:00

Player Size: 608x402 400x285 304x231

Responsive Sizing:

4. Go to the Drupal page where you want to embed the video. Make sure that the Text Format for the Body field is set to Full HTML (this is the default). Then use the three vertical dots on the right of the editing toolbar to open additional tools and select "Source"

5. Paste in the embed code you copied from MHC.

Where does Kaltura store your video files locally?

The [Kaltura desktop recorder](#) is designed for easy upload to [Media Hopper Create](#). However, there may come a time where you wish to have access to the native video files on your local machine. You can find these as follows:

Windows

1. Right click on the Kaltura Capture icon on the desktop.
2. Select Properties.
3. Click on 'Open File Location' and go up one folder to the 'Capture' folder.
4. Or simply go to:
C:\Users\\AppData\Local\Kaltura\Capture\

Mac

1. Go to the Finder.
2. From the Go menu, select Go to Folder.
3. In the form, enter
~/Library/Preferences/Kaltura/Capture/
4. Click Go.
5. Or simply go to:
/Users/<username>/Library/Preferences/Kaltura/Capture/
