

Virtual Classrooms

Virtual classroom tools for live online sessions

- [Collaborate](#) Collaborate is the name given to the centrally supported 'virtual classroom' service. Collaborate sessions can be managed entirely via a web browser with no need for client downloads. They can be scheduled via MyEd (useful for support staff and anyone who isn't attached to a Learn course) or via Learn (useful for course organisers / tutors wanting to host an online session with their students).
- [Zoom](#) Zoom will no longer be supported by the University after March 2026. Please [contact us](#), if you would like to discuss which tool would be best for your event.
- **Teams for teaching** – Microsoft Teams is now integrated with Learn Ultra; please see more information on how to enable it for your course [here](#).
 - Our post [MS Teams for Teaching](#)
