[Gavin.McCabe@ed.ac.uk](mailto:Gavin.McCabe@ed.ac.uk)

# Institutional drivers: Delivering student-led and credit-bearing experiential learning, at scale

- Key drivers
  - Portfolio learning, shifting from focus on accrual of knowledge, delivering and assessing graduate attributes
  - student agency (learning design and personal development),
  - Interdisciplinary working, in groups and teams
  - ***Curriculum Transformation – eg Experiential and Challenge courses***
- Our challenges
  - Scalability, limited resource, yet meaningful experience for all involved
- What has been critical for success
  - Design for the long-term aim from the outset
  - Students at the heart of experiential learning
  - Supporting reflection and surfacing growth
  - ***Wicked problems, but not setting up students to fail***
  - ***Making a mistake, but being able to learn from it (and getting credit for that learning)***

# Learning environments and activities

*'Curricular' activities* – within the curriculum and assessed for academic credit

*'Extra-curricular' activities* – those activities, likely optional, that are not tied to the curriculum, and could be inside or outside the institution

*Formal learning* – follows a syllabus and is intentional in the sense that learning is the goal

*Non-formal learning* - takes place outside formal learning environments but within some kind of organisational framework

*Informal learning* – takes place inside but also outside the learning institution and arises from the learner's involvement in activities that are not undertaken with a learning purpose in mind. Informal learning is 'involuntary' - an inescapable part of daily life

# Student-Led, Individually Created Courses

## What is a SLICC?

### *An experiential reflective learning and assessment framework using an e-portfolio*

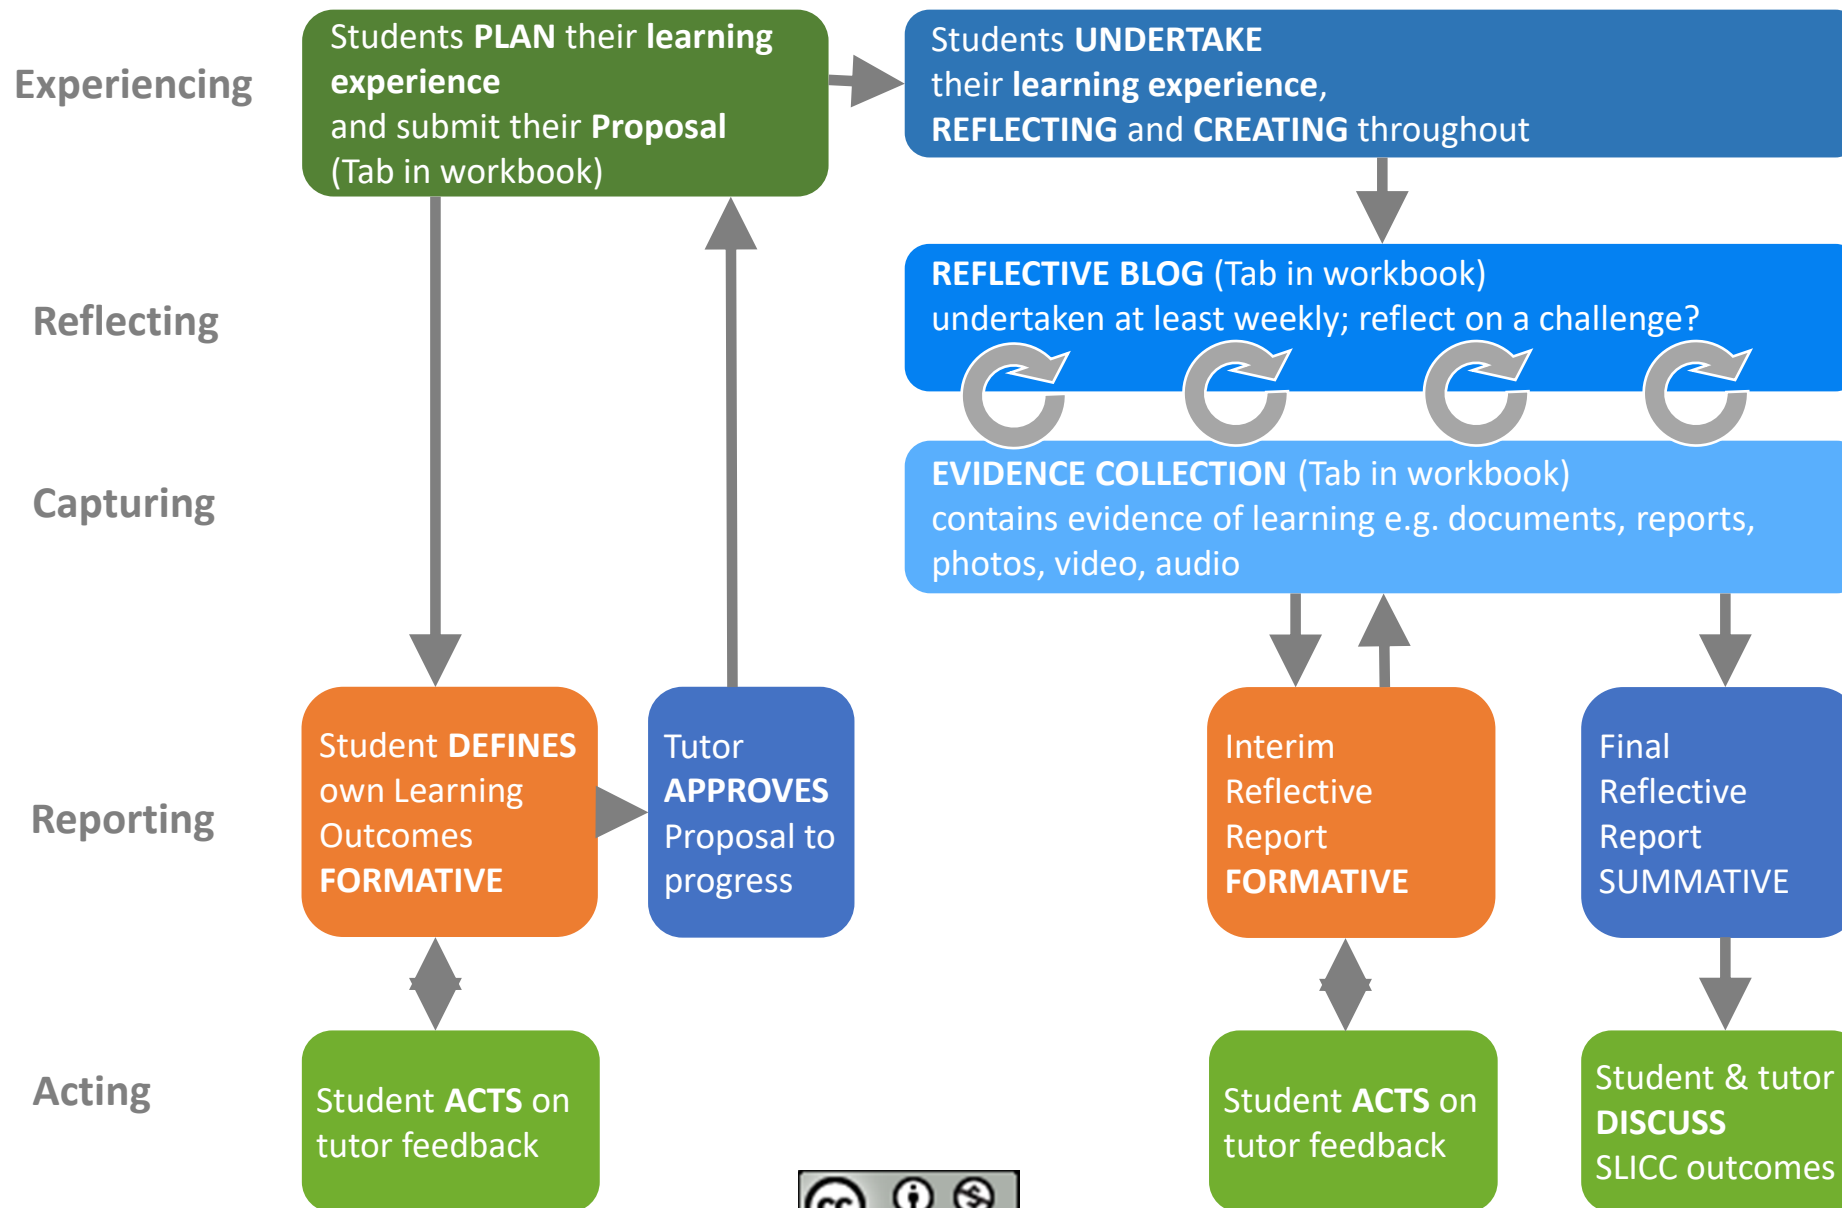

An 'empty' course, filled with experience and structured by reflection

- We define:
  - The process to receive academic credit
  - The generic Learning Outcomes (LOs)
  - The assessment criteria
- We can define – outline the type of experience
- Students define:
  - The content (what they want to gain from their learning experience)
  - How the LOs relate to their content
  - How they will evidence completion of their LOs – reflection and evidence

# Student-Led, Individually Created Courses

- 200 hours of activity, 20 academic credits
- Agency - students take ownership of their learning through the SLICC
  - 5 generic learning outcomes (analysis, application, focus on a specific skill, focus on a specific mindset, evaluation)
  - Stratified Learning Outcomes – increase in complexity / uncertainty / autonomy
- Central support for SLICC course leads and tutors across the institution
  - Resources to support students, course organisers, tutors, administrators
- Centrally run UG pre-honours ‘summer’ SLICC, as the testbed for innovation, and it is a ‘low risk’ training option
- Flexible (*and much more than we perceived when we starting this journey!*)
  - stratified Learning Outcomes pre-Honours, Honours, Masters and Professional Doctorate
  - solo, solo in a group, within a group project
  - Smaller component - 10 credits, e.g. one element of assessment in a 20 credit course)
  - *Different years working in interdisciplinary teams on the same project, using the same framework*
- <https://www.ed.ac.uk/sliccs/>

**Five generic Learning Outcomes:**

1. 'Analysis'
2. 'Application'
3. 'Specific skill'
4. 'Specific mindset'
5. 'Evaluation'

Each LO is clearly tracked through the SLICC workbook, providing a framework to enable students to develop a reflective experiential learning portfolio surrounding their defined experience

# Reflection is transformational, and its assessment is robust

- **Transformational – key skill that students need to be successful in their academic, professional and their personal journeys**
- Well characterised in the literature, particularly in vocational arenas  
<https://www.ed.ac.uk/reflection/literature/bibliography>
- **Educational reflective portfolios in teaching, nursing, social care, medicine, etc**
  - Students need to know what a portfolio is, and how to use it effectively
  - They need to know how to reflect (eg medicine transition from UG to PG portfolio training)
- Assessment criteria:
  - Why am I asking students to reflect (what do I hope they gain from it)?
  - Is there clear alignment between this assignment/activity and the course's learning outcomes?
- Consider aligning with a rubric – use and improve
- <https://www.ed.ac.uk/reflection/facilitators-toolkit/assessment/rubrics>

# Scalable, flexible – some examples of SLICCs

4TH FEBRUARY 2021

SLICCs (Student-Led, Individually-Created Courses): A Supportive experiential space where students can flourish

Image Credit: Graphic Design by Joe Arton, Original photographs by Unsplash.

In this post, Andrea Levy, a graduate of the Master of Public Health Programme, Sharon Levy the CPD lead for the Data Driven Innovation programme at the Usher Institute and Neneh Rowa-Dewar who co-directs the MPH (online) explain the value of Student-Led, Individually-Created Courses (SLICCs) as a profound opportunity for personal and professional growth...

# How the SLICC framework can be applied

Disciplinary learning applied in real-world contexts

Transdisciplinary learning, applied to oneself or a specific context

Self-directed experience or research (theoretical or applied)

Virtual teams

- Disciplinary / cognate disciplines
- Interdisciplinary
- Inter-institutional
- Multi-level

Credit flexibility built across the supporting framework (5, 10, 20 credits...)

# Disciplinary learning applied in real-world contexts

- Example contexts:

- industry, placements, community challenges, partner organisations – broadening and deepening disciplinary experience, engaging with industry and communities

- Example SLICCs:

- Online Masters in Public Health (MolGenPopHealthSci) - professional-level Masters, applying learning gained in their workplace or community
- Languages Beyond University (LLC) - pre-honours and masters students, working with local schools

# Transdisciplinary learning, applied to oneself or a specific context

- Example contexts:

- Careers thinking / Career Compass
- Equality, diversity, and inclusion
- 'The place of the discipline in the world'
- Graduate Attributes (meaningful application and development)
- Wellbeing and identity (personal, professional, academic)

- Example SLICCs:

- Student Selected Components (Medicine Y2) – team research into a topic of their choice, many looking at applied wellbeing for themselves
- Reproductive Biology Project (Y4) – portfolio on academic, personal, and professional skills development during capstone project

# Self-directed experience, or research (theoretical or applied)

- Contexts:
  - Value the experience itself
  - Within or beyond discipline
- Student agency:
  - Could be fully free-choice, or broadly or narrowly defined (with or without supporting resources provided)
- Example SLICCs
  - Self-Designed Learning in GEOSCI Y4 UG
  - Summer SLICCs (Y1-2 UG), open elective

# Virtual teams (Individual SLICC within team or team SLICC)

- **Disciplinary / cognate disciplines – broadening disciplinary experience**
  - Example SLICC: GloWD (tackling frontier global challenges from an art and design perspective)
- **Interdisciplinary**
  - Example SLICCs: NICE (UN SDGs), SACHA (challenge-based), SRS auditing
- **Inter-institutional**
  - Supporting global perspectives and links to Mobility for Learning by
  - Examples SLICCs: NICE, GloWD, SRS auditing
- **Multi-level (Y1-Y4)**
  - Examples of multi-year activities: ECA Design Agency, Formula Student, Hyperloop, SRS auditing, community engagement
  - Example SLICCs: Informatics Formula Student, SRS auditing

# Medicine - professional, vocational, defined and competency-based framework

10TH MAY 2018

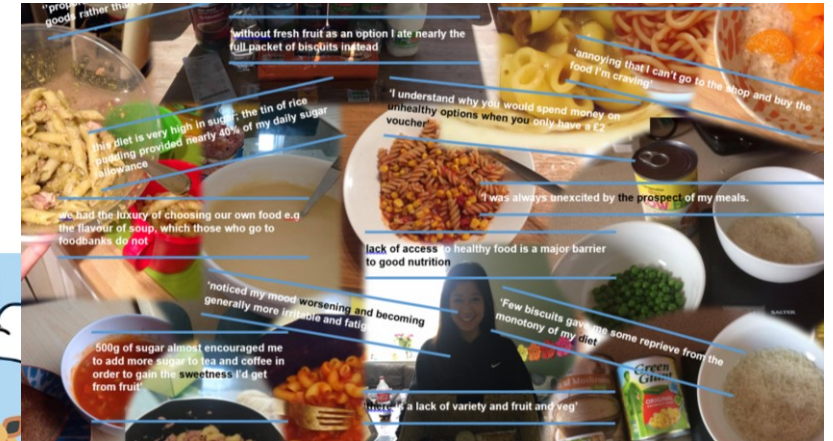

The group project SLICC in medicine: “In this course, you can do anything you want to...”

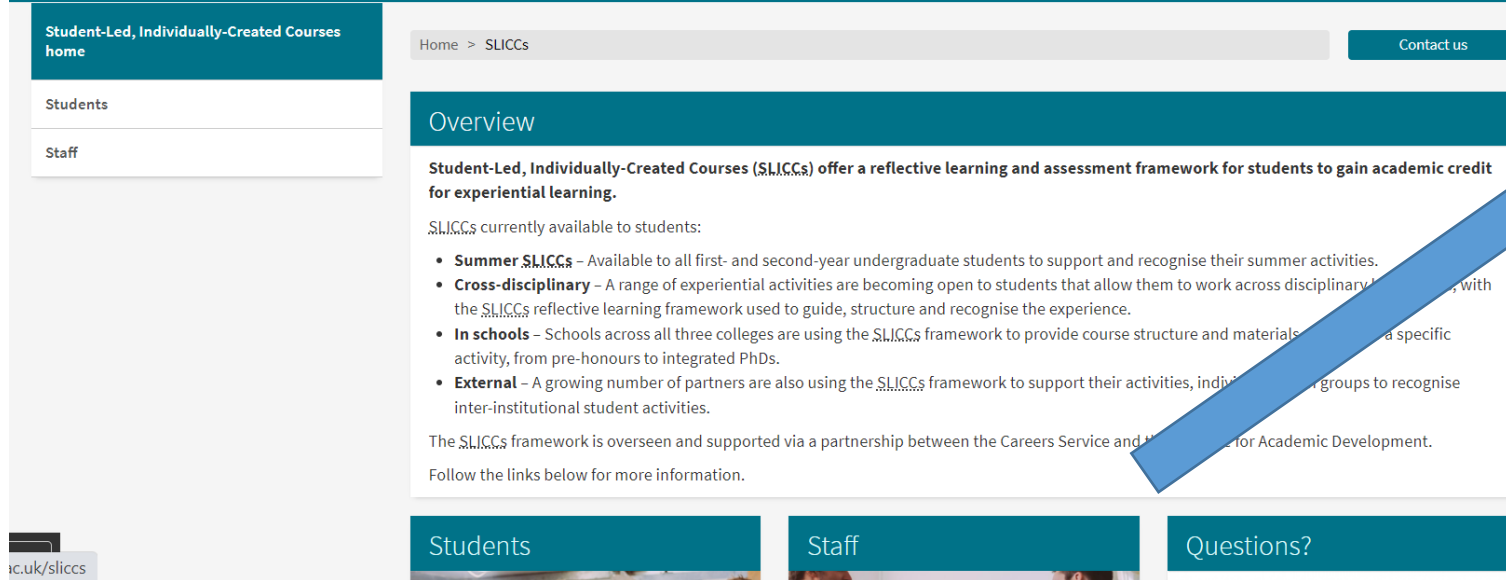

- Curriculum constrained by GMC, or is it?
- ‘Student Selected Components’
- ...define your own experience, and find your own group and tutor
- <https://www.teaching-matters-blog.ed.ac.uk/> (and several more SLICCs are described, search ‘SLICC’)

Evidence 8: Front cover of our final model child-specific resource demonstrating group creativity.

## Overview

**Student-Led, Individually-Created Courses (SLICCs) offer a reflective learning and assessment framework for students to gain academic credit for experiential learning.**

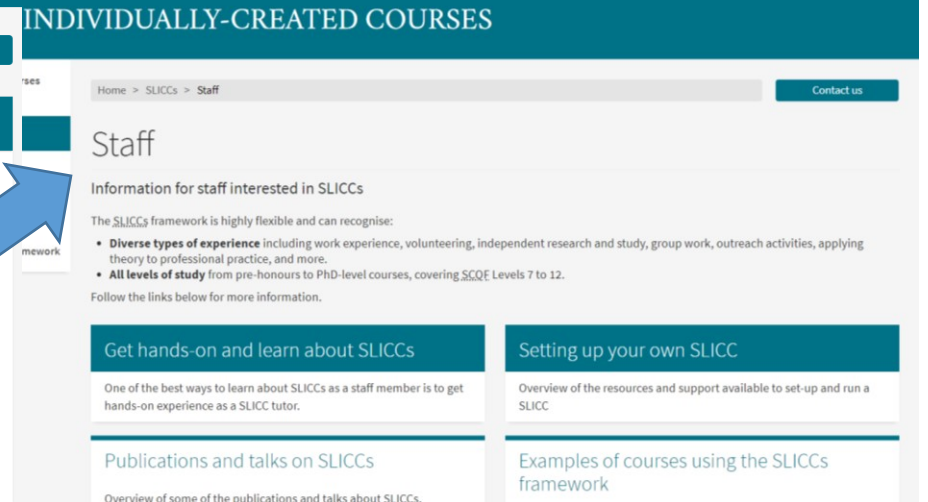

SLICCs currently available to students:

- **Summer SLICCs** – Available to all first- and second-year undergraduate students to support and recognise their summer activities.
- **Cross-disciplinary** – A range of experiential activities are becoming open to students that allow them to work across disciplinary boundaries, with the SLICCs reflective learning framework used to guide, structure and recognise the experience.
- **In schools** – Schools across all three colleges are using the SLICCs framework to provide course structure and materials for a specific activity, from pre-honours to integrated PhDs.
- **External** – A growing number of partners are also using the SLICCs framework to support their activities, including groups to recognise inter-institutional student activities.

The SLICCs framework is overseen and supported via a partnership between the Careers Service and the Centre for Academic Development.

Follow the links below for more information.

## Staff

Information for staff interested in SLICCs

The SLICCs framework is highly flexible and can recognise:

- **Diverse types of experience** including work experience, volunteering, independent research and study, group work, outreach activities, applying theory to professional practice, and more.
- **All levels of study** from pre-honours to PhD-level courses, covering SCQE Levels 7 to 12.

Follow the links below for more information.
