## Purpose & Objectives

- **Something Familiar:** We've developed an *internal* curated WordPress site accessible via Ease, similar to teaching matters for Schools/Deaneries and staff to learn from others as they shape and develop their own plans and approach to hybrid teaching.
- **Something New:** With a focus on curating and supporting staff's works in progress and ideas with carefully structured information architecture it's differentiated from a SharePoint approach to collaboration.
- **Something Useful:** This will support the sharing and exchange of insights, ideas and crucially experiences as we develop plans for the new academic year.

# Request for offers of content

- We're doing a soft launch next week. However, this is an iterative process and the design and content will be responsive to changes.
- We're currently looking for offers and recommendations of content and contacts to help populate the site. So please get in touch. Examples of practice, resources and scholarship, infographics, recordings, video content all welcome.
