

MAKE & LEARN

Craft Lesson 1 / Kite Making

1.

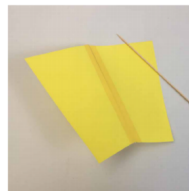

Fold an A4 piece of paper in half and make a diagonal fold about 2cm from the fold at the top and about 7cm from the fold at the bottom.

2.

Open the paper out to reveal the kite shape.

3.

On the other side, use masking tape to tape down the central fold. This will keep the kite together.

4.

Tape a wooden skewer across the widest part of the kite, trimming the skewer down to size using scissors (keep the pointy end for the next step).

5.

Turn the kite over and make a hole, sliding the pointy end of the skewer through. Make sure it's level with the taped down skewer.

6.

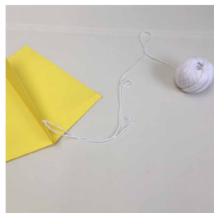

Reinforce the hole with masking tape, pierce through the tape with the pointy skewer.

7.

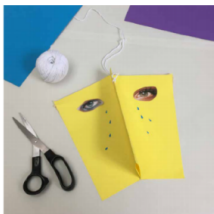

Tie on your piece of string.

Remember to keep the string in one big ball, no cutting!

8.

Decorate your kite using newspaper, coloured paper or pencils and felt tips.

9.

Try using newspaper, old plastic bags or tissue paper to add tails to your kite. Now it's time to fly your kite!

MATERIALS

- A4 paper
- full sized kebab skewers
- masking tape
- scissors
- string
- pens, pencils, colour paper or newspaper to decorate
