

Dr. Mikael ATTAL, PhD

October 2024

Date of birth: 12/09/1977

School of GeoSciences – Univ. of Edinburgh
Drummond Street, Edinburgh EH8 9XP (UK)
E-mail: mikael.attal@ed.ac.uk
Phone: [+44] 0131 650 8533

EDUCATION AND PROFESSIONAL EXPERIENCE

- Since 2023:** Professor of Geomorphology, Univ. of Edinburgh - School of GeoSciences, Edinburgh, UK.
2020-2023: Reader in Geomorphology, Univ. of Edinburgh - School of GeoSciences, Edinburgh, UK.
2016-2020: Senior Lecturer in Geomorphology, Univ. of Edinburgh - School of GeoSciences, Edinburgh, UK.
2007-2016: Lecturer in Geomorphology, Univ. of Edinburgh - School of GeoSciences, Edinburgh, UK.
2005-2007: Postdoctoral Research fellow, University of Edinburgh - School of GeoSciences, Edinburgh, UK.
2003-2004: Teaching assistant, Ecole Nationale Supérieure de Géologie - Centre de Recherches Pétrographiques et Géochimiques, Nancy, France.
2002-2003: Teaching assistant, Université J. Fourier - LGCA, Grenoble, France.
1999-2003: PhD in Geomorphology, Université J. Fourier - LGCA, Grenoble, France.
1998-1999: Master "Dynamique de la Lithosphère", Université de Nice – Sophia-Antipolis, France.
1994-1998: Degree in Earth Sciences, Université de Nice – Sophia-Antipolis, France.

RESEARCH EXPERIENCE

Professor of Geomorphology (University of Edinburgh, UK).

I combine the analysis of real landscapes (collection of field data, topographic analysis) with numerical modelling and experimental studies to constrain the relationships between tectonics, erosion and the development of topography. My current research focuses on understanding the coupling between hillslopes and rivers, characterizing and quantifying fluvial erosion and transport processes in mountain rivers, and defining the role that sediments play in modulating fluvial erosion rates. My work can help extracting tectonic information from topography, with implication for assessing seismic and landslide hazard. Understanding the release and transfer of sediment can also help retrieving past tectonic and climatic signals in the geological archive (stratigraphy), as well as mitigating risks in sedimentary basins. The risks I am particularly interested in include flooding risk from in-channel sediment aggradation (e.g., response of rivers to earthquakes), and siltation and heavy metal pollution from active and legacy mines.

2005-2007: Postdoctoral Research fellow in Quantitative Geomorphology (Edinburgh, UK).

Project: "Testing fluvial erosion models using the transient response of bedrock rivers to tectonic forcing".
Principal Investigator: Prof. Patience Cowie. Collaborators: Dr. Greg Tucker (Univ. of Colorado, Boulder), Dr. Gerald Roberts (Univ. College London), Dr. Alex Whittaker (School of GeoSciences, Edinburgh).

Summary: Understanding how landscapes respond to a tectonic or climatic disturbance represents one of the key issues in Quantitative Geomorphology. The goal of the project was to characterize the dynamics of landscapes responding to a tectonic perturbation in the Apennines (Italy). We characterised the response in the field and compared it to the response predicted by different fluvial erosion laws, using the "Channel Hillslope Integrated Landscape Development" (CHILD) model. This project has provided new constraints (1) on the mechanisms of river incision, (2) on the way rivers and landscapes respond to a given tectonic and/or climatic disturbance, (3) on the evolution of the distribution of sources of sediment across the landscape and (4) on the time it takes for landscapes to reach a new equilibrium.

December 2004 – January 2005: The “Clipperton Expedition”.

Chief Geologist during a Conservation Expedition on the French desert island of Clipperton (East Pacific).

Project: “Mineralogical and petrographic inventory of Clipperton”.

Summary: systematic sampling and analysis of the different mineral species exposed on the atoll (carbonates, phosphates and volcanics) in order to better understand the evolution of the island, the volcanism associated with the Clipperton Transform Zone and the cycle of phosphate bio-mineralization.

1999-2003: PhD in Quantitative Geomorphology (Université de Grenoble, France).

- **Project:** "Pebble abrasion during fluvial transport: experimental study and application to fluvial networks in active orogenic settings".

Supervisors: Dr. Jérôme Lavé & Dr. Jean-Louis Mugnier.

Summary: Terrestrial landscapes results from the competition between tectonics and erosion. Fluvial incision is the main process that controls erosion at the scale of mountain ranges; the sediment particles transported during floods as bedload are the tools for incision. The aim of this study was to characterize and quantify pebble abrasion during fluvial transport in order to better understand the downstream evolution of sediment characteristics and thus bring some constraints on the feedbacks between hillslope erosion, sediment transport, sediment erosion and fluvial incision. The project combined an experimental approach with a field study along the Marsyandi River (Himalaya).

- **Participation in a palaeoseismic study in the Himalaya, Nepal** (2001 and 2002, 15 days and 10 days). Construction of a trench across the Main Frontal Thrust, identification of a megathrust earthquake ($M_w \approx 9.0$) around A.D. 1100.

1998-1999 : Master "Dynamique de la lithosphère" (Nice, France).

- **Project:** "Tectonic and thermodynamic study of the Permo-triassic units on the Southern flank of the Argentera Massif (Southern Alps)".

Supervisors: Prof. Jean Delteil & Prof. Jean-François Stéphan.

Summary: This project aimed at defining the successive tectonic phases that led to the deformation of the South-Argentera Permo-triassic formations, from the maximum burying during the Oligocene to the recent exhumation. These phases were compared to the ones recorded in the post-Muschelkalk detached cover (Nice and Castellane arcs) and in the Argentera basement. The project involved structural analysis and thermobarometric study of fluid inclusions in quartz tension gashes.

Invited talk to UK universities: University of the Highlands and Islands (2023, online); Cardiff University (2022); University of the Third Age (U3A), Haddington (2018); University of Bristol, Durham University (2015); SUERC East Kilbride (2014); University of Glasgow, University of Newcastle (2011); University of Glasgow (National Telford Institute – SAGES Joint Workshop) (2010); University of Leeds (2009); Imperial College London, University of Newcastle (2008); University of Glasgow, University of Cambridge (2005).

Invited talk to overseas universities: State Key Laboratory of Earthquake Dynamics, Institute of Geology, Beijing, China (2024); Deutsche GeoForschungsZentrum (GFZ), Potsdam, Germany (2021, online); University of the Philippines Diliman, Quezon City (2019); Universidad Nacional Autónoma de México (UNAM), Hermosillo (2019); University of Bergen, Norway (2014); University of Nancy, France (2011); University of Pau, France (2008); University of Colorado at Boulder, USA (2005). University of Paris VI, France; University of Toulouse, France; Centre de Recherches Pétrographiques et Géochimiques, Nancy, France (2004).

Invited editor talk / publication workshop: AGU conference 2021, New Orleans, USA (with Prof. L. Montesi); Chengdu University of Technology, China (2023, online, with Prof. TC. Hales); British Society for Geomorphology Annual Conference, Edinburgh (2023); Regional Conference on Geomorphology, Cappadocia, Turkey (2023), 8th National Association of Geographers meeting, Kazi Nazrul University, India (2024, online); Chengdu University of Technology, China (2024, with Prof. TC. Hales).

TEACHING EXPERIENCE

In the UK: teaching Geomorphology, Geology and Sedimentology (lectures + practicals) and demonstrating during Geology and Geomorphology field trips (Iceland, Spain and Scotland) to students from 1st year to Master level at the University of Edinburgh (since 2005). Demonstrating during a Geology field trip in the Apennines (Italy) to Master students at Imperial College, London (2008, 10 days). Degree convenor for the Geology and Physical Geography degree (2015-2019), and Earth Science degree coordinator at the University of Edinburgh (2020-2023).

In France: 480 hours teaching at the University of Grenoble (1999-2003) and at the Ecole Nationale Supérieure de Géologie de Nancy (2003-2004). Preparation, delivery and marking of practical work and lectures in Geology (to students in 1st and 3rd year), Structural Geology and Geodynamics (1st and 3rd year), Geomorphology (2nd year), Sedimentology (3rd year), Igneous, Sedimentary and Metamorphic Petrology (2nd year), and Palaeontology (2nd year). Demonstrating during field courses in Geology and Glaciology (to students from 1st to 4th year).

PHD SUPERVISION

Principal Supervisor: Dr Edwin Baynes, Dr Justine Domingo, Dr Emma Graf. Current: Callum Strong, Masood Rehman, Anthony Hoskins, Zidong Yao, Donny Wahyudi.

Co-Supervisor: Dr Martin Hurst, Dr Fiona Clubb, Dr Lizzie Dingle, Dr Rebekah Harries, Dr Chrystiann Lavarini, Dr Laura Quick, Dr Saraswati Thapa, Dr Prakash Pokhrel. Current: Anya Towers, Qiuyang Chen.

SERVICE

Editor for the *Journal of Geophysical Research – Earth Surface* (since April 2021).

Associate Editor for the *Journal of Geophysical Research – Earth Surface* (Jan. 2016 – Apr. 2021), and *Geo: Geography and Environment* (2014-2018).

Degree coordinator: Earth Sciences, University of Edinburgh (2020-2023).

Degree programme convenor: Geology and Physical Geography, University of Edinburgh (2015-2019).

Honorary Treasurer: British Society for Geomorphology (2018-2021).

Reviewer for, in the last five years: the *Journal of Geophysical Research*, *AGU Advances*, *Earth-Science Reviews*, *Earth Surface Dynamics*, *Ecohydrology and Hydrobiology*, *Geology*, *Geomorphology*, *Open Geosciences*, *Proceedings of the Geologists' Association*, *Proceedings of the National Academy of Sciences*, and *Science Diliman*.

Reviewer for, in the last five years: the UK Natural Environment Research Council (NERC), the Dutch Research Council (NWO), the Swiss National Science Foundation (SNSF), the National Centre of Science and Technology of Kazakhstan, the Minerva Fellowship, the Pazy Foundation (Israel), the Leverhulme Trust and CIVIS3i (Europe).

Session chair: American Geophysical Union, San Francisco, California (2016, 2019); European Geoscience Union, Vienna, Austria (2018, 2019, Union session in 2021).

Organiser:

- *Modelling Tectonics and Topography* workshop, SUBITOP European Training Network, Edinburgh (April 2017).
- Sixth meeting of the FACSIMILE working group, Bergantes catchment, Spain (October 2018).
- Annual Conference of the British Society for Geomorphology, Edinburgh (September 2023)

PhD examiner: D. Hobley, University of Edinburgh (2010); M. Castillo-Rodriguez, University of Glasgow (2011); K. Whitbread, University of Glasgow (2012); M. Nexer, University of Caen, France (2015); H. Guillon, University of Grenoble, France (2016); S. Watkins, Imperial College London (2019); S. Swarnkar, Indian Institute of Technology Kanpur (2020); J. Zondervan, University of Plymouth (2021); E. Harvey, Cardiff University (2022); C. Ariagno, University of Grenoble, France (2022).

LANGUAGES

French: native language.

English: fluent.

Italian: read, written and spoken.
