STEP 4: Brush the glue onto the canvas If your canvas is small, you can simply brush it full of glue, adding a little water for better results. But if you have a larger canvas, you should brush the glue on in specific places before putting the material on to prevent the glue from drying out.

□□

STEP 5: Stick the material on in order, following the previous layout

□□

STEP 6: Brush another layer of glue over the pasted material The glue on the bottom is to hold the material in place and the glue on the top is to protect the collage from smudging and damage.
