**STEP 4: Brush the glue onto the canvas** If your canvas is small, you can simply brush it full of glue, adding a little water for better results. But if you have a larger canvas, you should brush the glue on in specific places before putting the material on to prevent the glue from drying out.

□□

**STEP 5: Stick the material on in order, following the previous layout**

□□

**STEP 6: Brush another layer of glue over the pasted material**  
The glue on the bottom is to hold the material in place and the glue on the top is to protect the collage from smudging and damage.
