

Michael Lloyd

Hailed as one of the UK's most prestigious silversmiths, Michael Lloyd, draws inspiration from his surroundings to create the majority of his work. His pieces are usually made from chased silver and gold and the illustrations on the surface of his vessels are a beautiful portrayal of the natural world. His designs offer a sense of escapism and provide a gateway to nature. I love Lloyd's use of nature, its influence on his work is evident with the organic flowing lines chased on his vessels.
