

Modelling Workshop

I really enjoyed the 2D and 3D modelling workshop despite it being a bit stressful to create the sculptures in such a short space of time. I'd like to incorporate some of my designs in the wax carving and chasing classes as I think some of the forms would work well, particularly the three I have chosen to photograph on the repeat pattern backgrounds. I have used lino cuts and carved stamps from potatoes to create the background repeat patterns for the photoshoot part of the class.
