

ISLAMIC GEOMETRIC PATTERNS — STUDIES

For this project, I did a lot of work on the side exploring different patterns. Each of these stand on their own and have helped me in understanding the construction of Islamic geometric patterns. In this section, which I have entitled studies, I have included a range of these. The first part includes simple line-drawn patterns. The second and third include construction lines as well as finalised and coloured forms. Finally the fourth includes its finalised form in addition to what it would look like when multiplied and continued.
