

# Survey Answers.

This survey was used to collect research data for a hypothetical Queer Culture Hub in Edinburgh. It was answered by 65 participants over the age of 18, who either live and/or socialise in Edinburgh. Participants are kept anonymous.

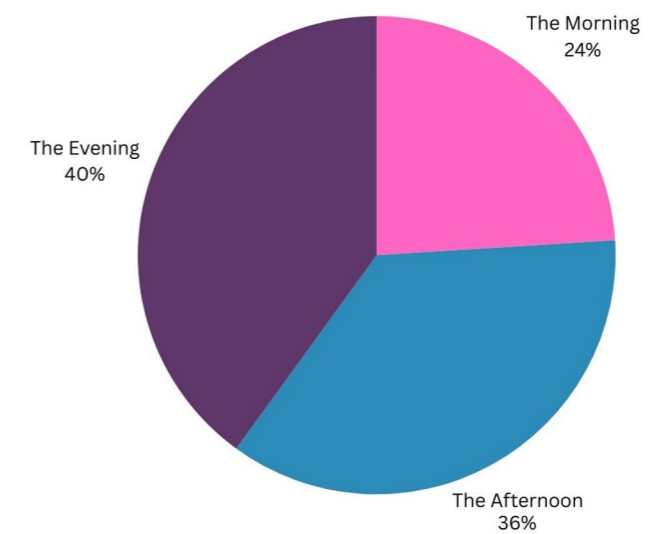

What is your age range?

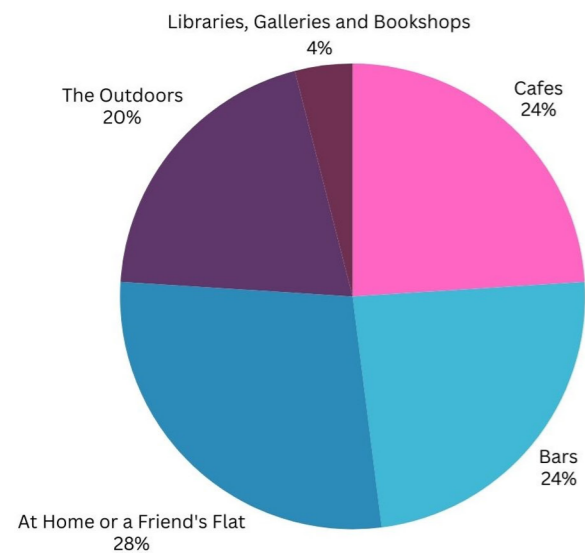

Are you a part of the Queer Community?

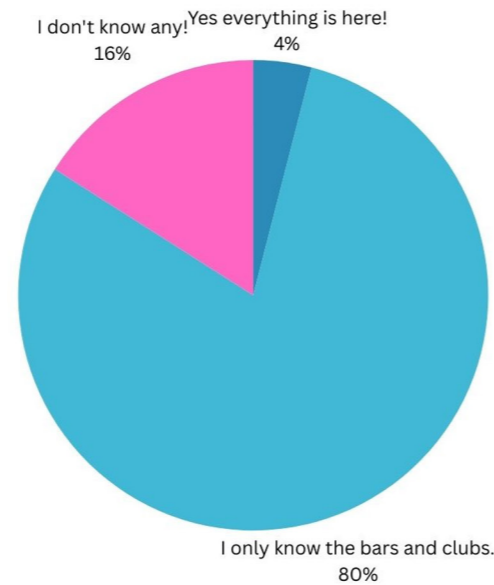

At what time of day do you enjoy socialising the most?

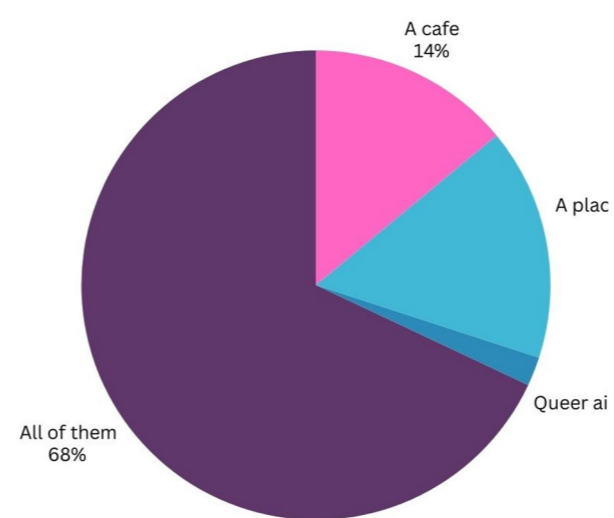

What type of places do you like to socialise in the most?

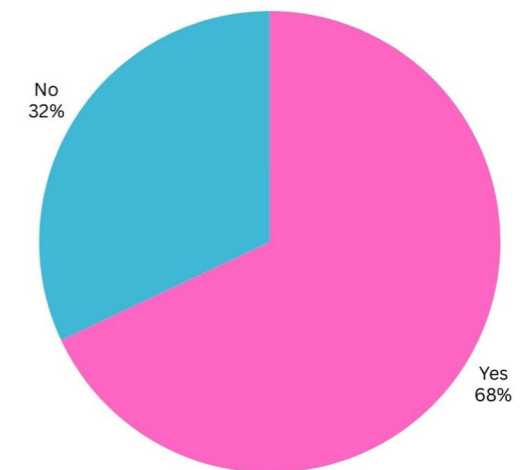

Do you feel like there are enough spaces to explore and connect through Queerness in Edinburgh?

What type of spaces would you want to be a Queer Culture Hub

Would you use Queer orientated health care facilities? (Sexual Health Clinics, Queer Conselling etc).

The data collected from this survey suggests that in order to accomadate for a wider range of the community it will be key to design spaces/functions that can be used from morning till evening. However, it is also clear that is the Queers of Edinburgh feel like there is a lack of daytime (non-bars) to enjoy/socialise in, so these types of spaces will be a key focus. With the majority of the Queer participants saying "Yes" to using Queer orientated health care it seems to be an essential part of what this project should offer.
