

yang 01:01

There's no way around this time of New Year and then it's all basically what everyone has to do. These two days then we got up even earlier, because these two days then added an Edinburgh market, these two days then were up at three o'clock.

xin 01:16

Is the Edinburgh market just on the way to another place to pick it up?

yang 01:20

Just local to Edinburgh, but then he's mostly some squid.

xin 01:30

still going tomorrow or not going tomorrow.

yang 01:33

Tomorrow and then they don't open Edinburgh Market, tomorrow should not open  
Edinburgh Market is a membership system and then you have to pay, but I haven't paid since the year before last because I have to go once in a while

xin 01:48

He is paying in one go. Or is it

yang 01:51

Pay once a year? I didn't pay it, then I didn't pay it last year, and I didn't pay it this year, so I went once in a while, and then I was too lazy to pay it.

xin 02:03

Is he just like one of those big markets?

yang 02:07

Very small, used to be very big, now very small, one on three, no now there should be two left, and then sell things inside, but there is an old man inside, and then they have squid, mainly just go to buy some squid, other things no things to buy, but they open early, they are 3point open.

xin 02:43

Picked up a lot from Glasgow today?

yang 02:46

Today should be quite a lot, but that car problems, and then rented a car or a small car, so lead us today a lot of goods then did not take, this kind of time the most afraid of car problems aircraft get, everyone is very tired, we will be open for two days, and then tomorrow the day after the day after the day after the big day are open, tomorrow Then want to let big brother do not go, because he went after, and then drag slow also delayed us things.

xin 03:24

You either tell him not to go.

yang 03:26

I didn't even take the phone, I didn't even leave his number. Then he said when he left today.

And then let him then go over and then no tomorrow then just keep him there and then cut the ribs or cut whatever.

Because it turns out that the little girl in my shop should catch on quickly.

xin 03:49

But big brother if you get fish to get something, get not, you let him help you move things and so on.

yang 03:59

Moving things also does not work, it is because moving things also does not work, then Fret, but finally try Then see then delivery line, if the delivery does not work, then it did not then completely out of the question.

xin 04:22

You should either try recruiting students for part-time jobs or something like that for students.

yang 04:26

Then students can't do our work, basically they can't do it, because then my friend opens a supermarket, then you students can't do it, and Long Royal (the name of the supermarket) is also very busy, and then the students recruited are basically then also not very capable of doing it. The main thing is that our work is too dirty, if it's not too dirty then it's not bad, our work is too dirty. Plus then our work is a little bit.

xin 05:14 Also tired.

yang 05:15

And then mixed with some. You need to teach more things, students, and then another is not suitable to come one to teach one, and then do two more days can not do, you have to re-teach, more trouble, and then in the restaurant and then when the waiter is not the same, and then tell you again, and then how to give guests on the finish

xin 06:42

What are you guys going to do for New Year's Eve?

yang 06:44

I don't know, now then I have no concept that

xin 07:02

I mean don't all kids have holidays and such too?

yang 07:08

Yeah, so there's nothing to say. There is also nothing over the holidays over the holidays.

xin 07:15

Just home cooking for dinner.

yang 07:20

Yeah I would have just opened it if it wasn't for the fact that then my parents then wouldn't let me work the first day .

yang 07:49

But exactly then which day I don't know, and for us which day we had, because we could have had a big 30 year, I don't know

yang 08:01

I open the shop, but then the evening should be dinner. Should will I don't know have to listen you listen then at home then right.

xin 08:12

Are you preparing your family to 4spend it, or is it.

yang 08:30

It's possible with my sister and then also don't know?

Because then my sister and them went to work, now then.

xin 08:37

All quite busy.

yang 08:38

It's very busy, like I haven't even had time recently. I've been then continuously. I started on Tuesday and then Tuesday and then basically I came home and both my kids had gone to bed, so I don't even know, I think it was a week right close to a week basically and then I didn't see them both too much because then they were both still up and then I went first and then they both went to bed and then I just went back.

xin 09:10

You need to hurry up and recruit here, you keep this up you can't physically.

yang 09:18

Then the main then. Right.

Tired is actually just fine, but it's just unbearable, and then the heart is tired, and then why the whole thing, and then one head and two big heads.

xin 09:40

So was it ever this hard to recruit before.

yang 09:44

It wasn't hard before.

There used to be so many actually. xin 09:50

Is it a lot of people? Are there more people doing the work?

This would say that people should just be able to work more. Now people have a little bit of money and then they go and open their own shop, a little bit of money and then they go and open their own shop, so everyone wants to be the boss, so it leads to then there are no employees.

xin 10:12

When you say it used to be a bit better to recruit workers is that about how many years ago or?

yang 10:17

4 years 4ago then recruiting and then it shouldn't be difficult.

xin 10:22

But it's not easy to set up shop over here.

yang 10:29

It's not much. It's pretty easy, you have the money and then you can drive.

xin 10:33

But money should not also be asked for the funds should be quite a lot.

yang 10:38

The Chinese run the shop then it's all cash and then buy direct, it's all everyone then you sell to me I I sell to you.

xin 10:48

I mean to open a shop, you cost rent mess isn't quite a lot of money.

yang 10:56

It's all about then working part-time and then saving some money, saving some money and then either investing it or buying it all the time anyway, but to be over here everyone generally chooses to invest.

xin 11:12

Let's say the approximate cost of opening a shop.

yang 11:15

Depends on what scale you open.

xin 11:16

The Chinese generally don't drive particularly put.

yang 11:22

basically are takeaway shop, takeaway shop from the takeaway shop open is to do foreigners, and then takeaway, basically everyone open is the kind of also look, and then also divided There are people pick up After buying the shop is not decorated, directly that do, and then also have also have, and then spend then seven hundred and eighty thousand, and then decorated also have, on the main depends on the boss, and then is which type, like my partner, and then he open takeaway shop, and then basically take He basically took the whole thing back and redecorated it, so he spent more.

xin 11:59

But what you are saying here is divided he is not the same type of person, you if you work to earn money to save money, you just started to say you.

One certainly cannot say that the investment is too great. yang 12:11

No, you have to look, like fujian person and then absolutely reloads.

xin 12:15

Why are the fujian person like this?

yang 12:18

They think then after the decoration, then it will be more able to attract guests, but then actually did not look at you then this shop before a hand to do how, do good, then in fact how are good, do not do well, even if the decoration of how beautiful, then after also may not be able to do up.

My partner now has in his hands, then a takeaway restaurant, which is then doing quite well, another one which is not doing so well, and then a restaurant which is doing quite well, Sancheon.

xin 12:58

That's quite a lot of shops he has opened.

yang 13:00

Yea oh yes he has very much in his hands but basically he doesn't even have to manage it anymore, he just manages the warehouse of Huaxing.

xin 13:13

He was recruiting people to manage for him.

yang 13:16

No All have partners, Fujianese then do not own business, Fujianese are all in partnership, just a shop are two or three more shares, and then four or five shares are there.

xin 13:33

But you see like in the country generally people say open a shop what makes money this kind of.

yang 13:41

Right, so right on splitting people up, didn't I tell you the other day that my partner and I then never do the math, we both never do the math.

xin 13:50

Would you say it's because Fujian people he does business with are more divided like this, or is it just the way business is done over here?

yang 13:58

Now the common model, then are divided into shares to do, because each person does not have to invest too much, and then when the time comes if they really then do not go on, each person will not lose too much, but also the scale of the branch Sanchuan then then on the investment is very large, is like I this kind of person then is absolutely not going to touch, need a very large amount of money, and then go to play with them.

xin 14:32

Is it a big investment in renovation is it?

yang 14:34

Renovation rent are His rent is also very expensive because it is directly opposite your Ai Da, the rent is also expensive, and then the renovation is also expensive.

xin 14:47

The three rivers should be quite profitable, right? The daily crowd is very large, like I don't go out for dinner to eat Sanchuan again also went a few times.

yang 15:03

Because that location of his is more suitable, you can harden the face upstairs and then change it into a hotpot restaurant with the face right next to him.

xin 15:19

The face was originally also fried, due to the influence of said Sanchuan

yang 15:22

he upstairs of the Facebook was also originally a stir fry, now then it has also been changed directly to a hot pot and grill.

xin 15:29

But like Sanchuan it is Sichuan cuisine, you have to say.

yang 15:36

It's not quite considered Szechuan, he does everything, Szechuan- Cantonese, and then he does everything, there's no proper, over here, it's mainly what you do individually,

basically then you do everything.

xin 15:48

I mean are all the people he went to set up shop from Fujian.

yang 15:55

Sanchuan now has three units all from Fujian.

xin 15:58

Like the Fujianese he basically came earlier, could it be that there are more relatives, relatives then come to work together?

yang 16:18

Also both I partner Then one of his takeaway shop doing very well takeaway shop, is he and his wife's, that called cousin with his wife's cousin then jointly opened, and then another one doing not very well, seems to be also with him then a cousin? or what, anyway, have relatives.

xin 16:53

Did your partner come earlier, or did he these relatives.

yang 17:04

About the same time came earlier.

xin 17:06

Did he bring his relatives along?

yang 17:07

Not. That's not true.

xin 17:13

Like in your case, say you work in a business over here and your family is in a village or something like that, would they contact you and say they want to come?

yang 17:23

Yes, but it is relatively small, because then my environment is rural, so even if I come up with it, I have to consider it. Then I had a friend at the time and he considered it, and then developed it for two years , because He is in China, and then he works in Alibaba. He is wrong. He was not in Alibaba. He was in another company, and then he worked on the Internet.

But then their company was specialised to the central government, and then those firewalls messed up, he was then then specialised then to Zhongnanhai side to do something like these, later then jumped to Ali, he went to Ali, then Ali has an overseas department , then you can then come overseas to do, he was going to have to ask some, then have to consider coming out, but did not come out, and finally did not come out, yes, it happened to be met the epidemic, at least met the epidemic, and then also ready to then get married.

xin 18:35

Then, like you said this, he is himself has a certain amount of knowledge and culture, yes, to say that he wants to come out, I want to say is there the kind that says simply want to come out and earn money, and then

yang 18:52

No. These friends of mine are then probably all in the country and then not having a regular job also lazy and then too lazy to get out.

xin 19:09

Did your friend like this say anything else would have.

yang 19:17

It's all there. Usually people ask.

xin 19:19

Asking is asking a mouthful and nothing more, right?

yang 19:23

I'm not sure if I'm going to be able to get in touch with you. He was in England.

xin 19:58

Were they influenced by you coming, that is, knowing how well or how well you were doing over here? And then want to come

yang 20:04

Then it seems to be.

We both didn't, we both basically seemed to come at the same time, he went to England and then I came to Scotland, he seemed to have studied the same subject as my sister he studied English nursing but came and did that as well and then totally

unrelated jobs.

Early is in the early days, then early with my sister is the same, then in the old people's home work, then later on good strange did did, then this called what occupation, what occupation, then the British side is not you can own , this don't record This recorded more trouble, then is he did is looking at a group of ladies, but are then Chinese people older, then 30 or 40 years old.

xin 21:23

I know what that one is called Mummy.

yang 21:25

Yeah, I wouldn't know what it's called as a career.

Yes, but then again it seems that they then provide a place to collect part of the money or how to get So many specific I then do not know how to operate He also did this for a period of time, and then then then may also want to stabilize after, and then find a boyfriend, and then his boyfriend is doing decoration, it seems that now is following him, and then the husband then do decoration.

xin 21:53

So you guys feel like there are quite a few studying this nursing over there, still.

yang 22:03

I don't know, it could be just right and then it should be quite a lot.

But then it seems he didn't seem to study English nursing, and then because he seemed to study general nursing it seems.
