

I don't even know, because our two personalities are not very compatible, so say then to not much chat, although say that we are a village, and then and is a classmate but then, there is not much crossover.

She was probably when I was at school, and then she also came to Scotland and then played for a few days.

xin 22:42

Are you on in Scotland.

yang 22:45

I went to school in Edinburgh.

xin 22:51

Are there many people coming out of your village Leigh?

yang 22:55

It doesn't seem like much. I don't know.

A few people That's just a few people, because specifically by now then also all want to, because I've been for more than ten years and then haven't been back Not properly then back to the village.

xin 23:18

Your parents are still in the village, now.

yang 23:21

Yes they are all in

xin 23:24

Is your village big? How many people are there?

yang 23:31

Not great, 200household.

200The households are not yet large.

Not much xin 23:37

Il don't know, you your village have 200 households. But you see you say 200 household out of a few households is quite a lot, our side I feel a household is not, and I have not heard to say who is abroad, and then how to go abroad to develop and so on.

yang 23:58

It should all have, I don't know, it's not even known, it should all have something.

xin 24:59

How do you think your sister chose Edinburgh straight away?

yang 25:02

There should have been that kind of recruitment at the time, I feel it was The main There should have been recruitment.

xin 25:15

It's a retirement home. She hasn't changed since she started working here, so I say how come she decided to stay here and just stay in Edinburgh.

yang 25:27

Then I wonder what she was thinking not knowing.

xin 25:31

So what do you think, you'll be in Edinburgh when you come and then choose to live in Edinburgh afterwards?

yang 25:37

Get used to it. And then because I came and then went to London a couple of times after that, because I couldn't take it, and then directly over here, they said if you do business, then don't do business in Scotland, there's not much money to be made.

xin 26:00

How did you guys pick Scotland.

yang 26:01

Just lazy, then let me now, then go move to England or whatever if I'm lazy.

xin 26:18

They say that when Chinese people come they are basically in the big cities and then Chinese people do better in business, is that right.

yang 26:30

Yes, we then went from school, and then there was school work that is to say all used to, so that also lazy lazy go again, I may be the kind of more comfortable, and then just lazy, and then never considered.

Before then just now talking to me on WeChat, then he used to be from Edinburgh too, but he's now in he went to Liverpool and then Birmingham, he's now then in Birmingham.

xin 27:09

Also open a shop.

yang 27:12

It's also exactly the same as what I did, but then it's so much bigger than ours.
It's probably my shop plus Glasgow's shop, and then it's got to be doubled, more than doubled and doubled some more.

xin 27:33

In Birmingham, seafood is basically sold to China as well.

yang 27:40

It has it all, what he calls the indoor market, and then he has his own stall inside the market then, so then there will be quite a few foreigners probably.

xin 28:04

Basically you feel it's just that you know people in, Edinburgh because they all choose Edinburgh straight away, or do you end up choosing from somewhere else?

yang 28:12

The group of elderly people I know seem to be basically in Edinburgh, it seems, basically.

xin 28:21

Never just Edinburgh, and then it didn't go.

yang 28:23

From the time I met it has been in Edinburgh anyway, but as for then my partner before it should not be the first stop should not be Edinburgh either, it should not be No it seems to be, because his first stop seems to be too .

Then it's Mikawa, then the owner is from Edinburgh, then which shop do you know?
You name it.

xin 30:41

Do you ever think Edinburgh is actually kinda like Shandong?

yang 30:49

Like Shandong?

30:50

It just feels like there's a sea and a mountain.

yang 30:53

Not much feeling no not much feeling.

Because then in the domestic time actually then also then will not be every day then go out to play or how, the first basically then then to say a bad word, then I am not right, to I have been until before going abroad seems to have basically not out, and then we Weihai City not to mention Weihai City even county-level cities, and then Rongcheng City I have not been out.

xin 31:27

You are in Weihai.

yang 31:29

Yes, we all belong to Weihai, we all belong to Weihai, because there are so many more under Weihai, there is also Lushan City under Weihai, and then Rongcheng City, and then the mess, it is divided into geological prefecture-level cities , and then with the county-level cities seem.

xin 31:44

You are in Weihai Rongcheng.

yang 31:47

Yeah, now then the division, then we were still part of like we were still part of some stone island town, but now it's not even called stone island town. Now it's called what stone island stone island what the hell? I forget I don 't even know, and then what is our side called now? Yeah.

xin 32:17 Neither.

yang 32:18

It seems that now Stone Island is then divided into a district again and then none of it is understood.

You can't even write the words like we used to, I would only write Rongcheng City, Shandong Province, and only later would I then write Weihai City, Shandong Province.

We also seem to have been later all divided into weihai.

xin 32:42

It used to be Rongcheng when you weren't here, when you were still at home.

yang 32:53

Yeah, and then when I was in high school, then we went to all boarding schools, so it was not possible to go out at all, so to speak.

xin 32:59

I also board, put a half day a week or something.

yang 33:05

We are on for a month then released the night before, then released the next day, then back to school at noon.

xin 33:15

Just come out and don't even do anything, maybe take a shower.

yang 33:21

It's just going home, then giving you a ride home, then a change of clothes then coming back.

Like with the boys, then we then do the laundry, usually then pile up a month's worth of clothes and then take them home. Wash them and then take them back.

xin 33:30

You said your high school was in your village?

yang 33:38

Not.

He is another town

xin 33:40

Is it far from your home?

yang 33:47

It shouldn't be very far, should then I Because then it's all by bus, and then it's not doing anything, it should also be possible to drive for a few minutes. It's only ten minutes.

xin 33:56

Your sister is a total of how many years older than you? Like you study or something is not basically he is in charge of him to tell you where to go on

yang 34:06

also no. And then if it was my sister, then also we both differed⁶ in age actually then school I don't know I don't have a concept, it seems to be always followed my sister, then we primary school then with junior sister high school then is separate, so it seems to be when I was in primary school, should my sister already in junior high school, should be so over, should be such a concept, so basically then didn't control me, my sister basically seems to have not controlled me, but The first time I was in high school, he said that I could either take the exams at home or go outside if I couldn't. I felt at that time that there was more of a way out .

xin 35:01

I say your sister is learning English nursing again all this is her own idea, no one is giving her pointers or there is no one at home.
